DICTANET  **Speech to Text**

Digital dictation and professional speech recognition

Are you aware that you can dictate a written document three times as fast as you or anyone may type it? DictaNet Speech to Text helps you to free up time for other important tasks.

DictaNet Speech to Text is

- Quick to learn
- Intuitive to handle
- Safe

Start now and increase productivity at work.

This is how simple DictaNet Speech to Text works

- 1 Download DictaNet on your smartphone or on a professional recording device and record what you wish to say.
- 2 Send dictation quickly and securely to your secretary or typist – anytime, anywhere.
- 3 On receiving the dictation your secretary chooses audio playback for manual typing (using DictaNet Player) or translation into text. After fitting the text into your corporate layout the document can be sent back to you.

... so all you have to do is cross check that everything is correct. It's that simple!

Using the inbuilt administration module the document can comfortably be sent to the recipient or simply saved into a file.

Features:

- Compatible with iPhone and Android smartphones
- Compatible with professional dictation hardware
- Gesture controlled
- Intuitive Sclipwriter for your secretary
- Compatible with foot pedal
- Encryption 256-Bit AES
- Drag & drop function for sending documents
- Recording while document (e.g. Power Point presentation or photo) is open
- Smart correction
- Channels: Wifi, email
- Interfaces to Dropbox and Google
